## Base Portfolios

At the request of the Directors of Wealth Within Limited, we have undertaken a review of the performance of the two base portfolios (Blue Chip and Growth) for the seven year period 7 April 2003 to 6 April 2010.

The review confirmed that the share prices and dividends used by Wealth Within Limited to calculate the performance of each of the portfolios during this period are accurate.

PKF also conducted a review of the performance methodology used to calculate the performance of each stock and each portfolio. The results of the review confirmed that the methodology adopted by Wealth Within Limited is reasonable and accurately reflects the results achieved for these portfolios.

The cumulative net return on each base portfolio for the period 7 April 2003 to 6 April 2010 was:

Growth Portfolio	191.70%
Blue Chip Portfolio	129.13%

The two base portfolios provided to PKF have been prepared by Wealth Within Limited on the basis that the shares in each portfolio are the same recommendations provided to clients who have subscribed to the Portfolio Advisory Service and/or traded for clients in the Direct Equity Managed Account Service. The stocks held in the base portfolios may not be reflective of all stocks held in a client portfolio, given that subscribers randomly subscribe to the services.
